Objective

Final-year CSE (AI & ML) student at VIT Bhopal with a strong foundation in Java, full-stack web development, DSA. Experienced in building end-to-end applications using Java, Spring Boot, React, and MySQL. Seeking a Java Full Stack Engineer role to contribute to scalable enterprise solutions while growing within a structured organization.

Education

VIT Bhopal University <i>Bachelor of Technology – Computer Science & Engineering (AI & ML)</i> CGPA: 8.64/10.0	Bhopal, MP 2023 – 2027
R.J.R.R.S.D College <i>Intermediate (Class XII)</i> Percentage: 71%	Madhubani, Bihar 2021 – 2022

Technical Skills

- **Core Java:** OOP, Collections Framework, Exception Handling, Multithreading, JDBC
- **Backend Frameworks:** Spring Boot, Spring MVC, REST APIs, Flask
- **Frontend:** React.js, JavaScript (ES6+), HTML5, CSS3
- **Languages:** Java, Python, C/C++, JavaScript, SQL
- **Databases:** MySQL (Relational), JDBC, JPA/Hibernate (Basic)
- **Libraries & Tools:** NumPy, Pandas, Scikit-learn, Matplotlib, Tableau
- **DevOps & Version Control:** Git, GitHub, VS Code, IntelliJ IDEA
- **DSA:** Arrays, Linked Lists, Trees, Sorting & Searching
- **Relevant Coursework:** Data Structures & Algorithms, DBMS, OS, OOP, Cloud Computing
- **Soft Skills:** Adaptability, Communication, Teamwork, Attention to Detail

Projects

RestroSphere – Restaurant Management System *React.js, Node.js, Express.js, MongoDB, Mongoose, Passport.js*

- A full-stack restaurant management system with a RESTful backend exposing 8 API endpoints across 2 resource modules.
- Implemented secure user authentication using Passport.js with bcrypt password hashing, protecting all endpoints via custom middleware.
- Designed and integrated RESTful APIs with a React.js frontend for seamless data handling and user interaction.
- Designed 2 Mongoose schemas with enum-based validation for role and category data, enforcing data integrity at the database layer.
- Created responsive dashboards and management panels for easier navigation and operational control.
- Deployed the frontend and backend separately using modern cloud deployment platforms.

Healthcare Appointment & Queue System *Java, Spring Boot, React, MySQL, WebSocket, JWT*

- A full-stack healthcare appointment and queue management platform using Spring Boot and React, enabling patients to book appointments and track live consultation queues in real time.
- Built secure RESTful APIs with Spring Boot and JWT-based authentication, covering patient registration, doctor scheduling, and appointment management workflows.
- Implemented WebSocket-based real-time communication for live queue updates and appointment status notifications, reducing patient wait-time uncertainty.
- Designed and optimized relational MySQL schemas for patient records, appointment logs, doctor availability, and resource allocation, ensuring data consistency across the platform.

Certifications

Machine Learning with Python / *Coursera*

Completed: Dec 2025

- Skills: Scikit-Learn, Regression, Classification, Clustering, Model Evaluation

NPTEL – Cloud Computing / *Elite Grade*

2025

- Cloud architectures, deployment models, scalable system design

Achievements

- Solved 500+ problems on LeetCode, showcasing strong DSA and problem-solving skills
- Contributor in Hacktoberfest 2024-25
